

PENROSE TILES KNITTING CHARTS

I generated this graph paper at <http://incomplete.com/graphpaper/asymmetric/> to match my tension with the yarn + needles I had decided to use.

I am working in garter stitch as it is flat.

I just drew the tiles onto the graph paper with a ruler and protractor.

I make some of the reductions using k2tog and others I just slip the very edge stitch over the next one, to minimise distortion

where the slope is very shallow.
